

FilterTech 50

SURTEK Filter Tech 50

Closed-loop Filtration System for Ultrasonic Cleaning Machines.

As known, contaminated ultrasonic cleaning baths causes both decreasing of cleaning results and ultrasonic power loss. So contaminated baths must be changed frequently. Frequent replacement of the baths cause increase compound consumption which means increasing of costs. This situation pushes consumers to change baths rarely to save cost.

SURTEK Filter Tech 50 provides to clean the ultrasonic baths with a closed –loop filtration system. This system can save up to 90% of compound according to the traditional system. So the baths remain always clean. Also Filter Tech 50' preserve 'recovery' more safely than other methods and the sludge can be taken out of the machine easily when needed.

Why SURTEK Filter Tech 50?

- 1- % 100 reliable 'Recovery'
- 2- Save Up to %90 of the Compound
- 3- Always Clean Ultrasonic cleaning bath
- 4- End of manually flocculation
- 5- Environmental friendly
(less water consumption)
