demands

**WORLD FIRST
AUTOMATIC CHANGE
OF HOLDERS**

SF-3 with automatic change of holders

The new SF 3 stream finishing unit now offers the option of an automatic tool changer, which is effected by means of an HSK-63 adaptor.

The magazine for the holder changeover can accommodate up to 18 holders. The workpiece to be finished can be clamped in this holder in both internal and external diameters.

Streamfinish machine SF-3 Pulsfinish with HSK 63-interface for automatic change of holders

Work pieces can be fixed on outside and inside diameter. Example here: fixed on outside diameter.
